About the job

Why Join Exadel

We're an AI-first global tech company with 25+ years of engineering leadership, 2,000+ team members, and 500+ active projects powering Fortune 500 clients, including HBO, Microsoft, Google, and Starbucks.

From AI platforms to digital transformation, we partner with enterprise leaders to build what's next.

What powers it all? Our people are ambitious, collaborative, and constantly evolving.

At Exadel Financial Services, we specialize in banking, capital markets strategy, and technology consulting. We are committed to service excellence and being a great place to work.

What You'll Do

- Develop and maintain applications using C#.NET and WPF
- Work with Kafka and MSMQ for messaging and integration
- Build Windows applications and components

- Implement features using ASP.NET and other .NET framework components
- Write and optimize SQL queries for SQL Server or other relational databases
- Collaborate with cross-functional teams to deliver software solutions
- Follow Agile methodologies and participate in Agile ceremonies
- Use Git for version control and collaborative development

What You Bring

- Proficiency in C#.NET programming language
- Strong experience with both WPF and Kafka (must-have)
- Solid understanding of the .NET framework and its components, including ASP.NET
- Experience with relational databases such as SQL Server
- Experience with MSMQ messaging system
- Proficiency in Git for version control
- Strong communication and teamwork skills

Nice to Have

- Strong understanding of Object-Oriented Programming (OOP) principles
- Knowledge of concurrency and multithreading patterns
- Experience with unit testing and debugging code
